Humphrey Chama

Computer Science Graduate | Software Developer | AI Integration

Ndola, Copperbelt Province, Zambia | 0975 227 275 | chamahumphrey733@gmail.com

Profile

Computer Science graduate with practical experience in software development, backend systems, database management, API integration, information management systems and AI-powered applications. I enjoy solving practical problems through technology and building systems that make work easier, improve access to information and support better decision-making. I use GitHub Copilot, Claude Code and DeepSeek for development, debugging and problem-solving, and prompt engineering is one of my strengths.

Education and certifications

BSc Computer Science, Mukuba University
Graduated 2025, awarded with Merit.

Certificate in Leadership and Supervisory Skills Management, TVTC

Experience

Customer Care Support / Office Customer Care Assistant, Platinum Courier Services, Ndola

- Supported customer service and day-to-day office operations.
- Helped handle customer enquiries and operational issues in a busy courier environment.
- Gained practical exposure to operational workflows and service delivery.
- Acted in a supervisory capacity when my supervisor was absent.

Attachment: billing system, Nchanga North General Hospital

- Practical exposure to an information system used in an organisational environment.

Projects and initiatives

- **Nzelu AI** (development team member): Zambian educational technology platform for teachers. I connect backend systems with AI services so the application can process educational books and generate relevant answers.
- **BooxClash Learn** (co-founder / contributor): game-based learning concept for K-12 education.
- **Zikomarket** (co-founder): digital marketplace initiative.
- **PlanFi** (co-founder / contributor): AI-powered teaching-assistant concept for Zambian teachers.
- **Smart Automatic Timetable**: timetable management solution that is in use.
- **ChristTech Academy Management System**: management system developed for an educational setting.
- **AI Tutor Demonstration**: presented at the ICTAZ General Meeting, 2024.

Technical skills

- **Backend and software development:** C#, ASP.NET Core, REST APIs, API integration, software engineering fundamentals
- **Databases:** SQL, MySQL, SQL Server, database design and management
- **AI and development workflows:** AI integration, prompt engineering, GitHub Copilot, Claude Code, DeepSeek, AI-assisted coding and debugging
- **Programming and data:** Python, data analysis fundamentals, Power BI and dashboards, machine learning fundamentals
- **Computer science:** cloud computing fundamentals, distributed and concurrent systems, web development, computer networks, operating systems, data structures and algorithms

Leadership and involvement

- President, ICTAZ Mukuba University Student Chapter
- Class Representative, 2025 graduating class
- Public Relations Advisor, ZAYBRIF
- Co-founder, Zikomarket
- Co-founder / contributor, BooxClash Learn and PlanFi
