CHAMA HUMPHREY

SOFTWARE DEVELOPER | C# / .NET | API DEVELOPMENT
SYSTEMS INTEGRATION

Ndola, Copperbelt Province, Zambia | +260 975 227 275 | chamahumphrey733@gmail.com

PROFESSIONAL SUMMARY

Computer Science graduate with a Bachelor of Science in Computer Science (Merit) and hands-on experience in software development, database systems, API development, system integration, business process analysis, and technology-driven process improvement.

Experienced in designing and developing database-driven applications and integrating software systems to facilitate structured exchange of information between applications. Practical experience includes the development of a billing system integration involving KCM-related workflows, database-backed business applications, and operational systems designed to automate manual processes.

Strong technical foundation in **C#, .NET/ASP.NET Core, JavaScript, Python, SQL, REST APIs, JSON, relational databases, and web application development**, with particular interest in enterprise application development, API integration, backend engineering, and digital transformation.

A problem-solving and systems-oriented developer capable of analyzing business requirements, designing technical solutions, developing application functionality, working with databases, testing APIs, and translating operational challenges into practical software solutions.

TECHNICAL SKILLS

Programming	C#, JavaScript, Python, SQL HTML5, CSS3
Backend & APIs	ASP.NET Core Web API, .NET, REST APIs, JSON, JWT
Databases	SQL Server, MySQL, PostgreSQL, Entity Framework Core
Integration	API Integration, REST, HTTP/HTTPS, Data Exchange

Tools	Visual Studio, VS Code, Git/GitHub, Postman, Swagger
Analytics	Power BI, Data Analytics, ETL, Data Modelling, Reporting

PROFESSIONAL EXPERIENCE

PLATINUM COURIER SERVICES — ZAMBIA

Customer Care Support / Office Customer Care Assistant

Ndola, Zambia | July 2025 – Present

- Provide customer support and resolve enquiries relating to parcel collection, delivery, tracking, complaints, damaged parcels, refunds, and other courier-service issues.
- Analyze operational workflows and identify areas where technology and automation can improve efficiency, accuracy, and customer service.
- Work with operational data and records to support accurate information management and reporting.
- Identify recurring operational challenges and propose technology-driven approaches for improving business processes.
- Support the handling and documentation of customer cases, ensuring information is accurately captured and available for follow-up.
- Work closely with operational teams to understand business requirements and identify opportunities for digital transformation.
- Apply software development and systems-analysis knowledge to evaluate existing manual processes and propose improved digital workflows.

BOOXCLASH LEARN LIMITED

Software Developer / Technical Team lead (part time)

Lusaka, Zambia | June- December

- Participated in the design and development of software applications and technology-based solutions.
- Developed application functionality using web-development technologies and database systems.

- Worked with relational databases to store, retrieve, and manage application data.
- Assisted in translating business and user requirements into functional software components.
- Participated in troubleshooting, testing, and improvement of application functionality.
- Worked with application workflows, data processing, and user-facing functionality.
- Collaborated on software projects requiring database management, application logic, and user-interface development.

TECHNICAL PROJECTS & SYSTEMS INTEGRATION EXPERIENCE

BILLING SYSTEM & KCM INTEGRATION

API / Systems Integration Project

Developed and integrated a billing solution designed to facilitate communication between an internal billing application and KCM-related business workflows.

Key Contributions

- Developed an API-based integration for exchanging billing-related information between systems.
- Implemented system-to-system communication using RESTful API principles.
- Worked with structured JSON data for API requests and responses.
- Developed and tested API endpoints used within the billing workflow.
- Integrated application functionality with a relational database for storing and retrieving billing information.
- Implemented data validation and processing to improve consistency between internal and external system information.
- Tested API requests, responses, authentication, and integration workflows using Postman.
- Implemented error-handling approaches for failed requests and unexpected responses.
- Analyzed integration workflows and resolved issues affecting communication and data processing.

Technologies: C#, .NET/ASP.NET Core, REST API, JSON, SQL, Entity Framework Core, Postman, Swagger/OpenAPI.

PLATINUM COURIER MANAGEMENT & CUSTOMER CARE SYSTEM

Software Design & Development Project

Designed a digital platform to address operational challenges identified within courier-service workflows.

Key Features

- Parcel tracking and status management.
- Customer complaints management.
- Undelivered parcel management.
- Damaged parcel reporting.
- Refund management.
- Customer communication records.
- Office management.
- Customer-care case management.
- Operational dashboards and reporting.
- Workflow automation.

Technical Focus: Web Development | Database Systems | API Design | Workflow Automation | Business Process Analysis

ZIKOMARKET

Co-Founder / Software Project

Co-developed an e-commerce platform designed to provide students with convenient access to groceries and essential products.

- Developed and supported application functionality.
- Worked with database-driven product and order management.
- Contributed to user-facing web functionality.
- Participated in analyzing business requirements and translating them into software features.

EDUCATION

MUKUBA UNIVERSITY — ZAMBIA

Bachelor of Science in Computer Science **— Merit**

2025

Relevant Coursework

- Software Engineering
- Database Systems
- Systems Analysis & Design
- Web Development
- Computer Networks
- Distributed Systems
- Cloud Computing
- Data Structures & Algorithms
- Machine Learning
- Data Analytics

LEADERSHIP & PROFESSIONAL ENGAGEMENT

INFORMATION AND COMMUNICATIONS TECHNOLOGY ASSOCIATION OF ZAMBIA (ICTAZ)

President — Mukuba University Student Chapter

• Supported ICT professional development initiatives and technology-focused activities for students.

• Engaged with students and stakeholders on ICT-related programmes, professional development and technology opportunities.

• Supported initiatives aimed at increasing students' exposure to professional ICT environments.

PROFESSIONAL DEVELOPMENT

Currently strengthening professional capability in:

C# & .NET | ASP.NET Core Web API | RESTful APIs | Systems Integration | SQL Server | Entity Framework Core | JWT Authentication | API Security | Swagger/OpenAPI | Postman | Artificial Intelligence | Machine Learning | Python | Data Analytics | Power BI | Cloud Computing
